

EXCAVATION SERVICES

At **Emergency Plumbing**, we specialize in providing top-notch plumbing services for excavation projects. Whether you're building a new property, renovating an existing one, or simply need plumbing repairs in areas where digging is required, we've got you covered. Our team of highly skilled and experienced plumbers are well-versed in excavation work, ensuring that all plumbing-related tasks are carried out efficiently and effectively. We understand the unique challenges that come with excavation projects and are equipped with the knowledge and tools to handle them with precision.

Our Excavation Plumbing Services include:

- 1. Trenching and Pipe Installation:** We are experts in digging trenches and installing pipes for various plumbing systems, such as water supply lines, sewage lines, and drainage systems. Our plumbers ensure proper placement and alignment to prevent future issues.
- 2. Sewer and Drain Line Repairs:** If you're experiencing blockages, leaks, or damaged sewer and drain lines, our team can efficiently identify and repair the problem. Using the latest technology, we locate the issue and provide precise solutions to restore proper flow and prevent further damage.
- 3. Foundation Plumbing:** For new construction projects, we offer foundation plumbing services to install plumbing systems before the foundation is poured. Our team works closely with contractors to ensure all plumbing requirements are met, including water lines, drain lines, and gas lines.

4. Sump Pump Installation: If you have a basement or an area prone to flooding, our plumbers can install reliable sump pump systems to protect your property from water damage. We assess your needs and recommend the most suitable sump pump solution for your specific situation.

5. Sewer Line Cleaning and Hydro Jetting: Over time, sewer lines can accumulate debris and blockages, leading to backups and unpleasant odors. Our hydro jetting service utilizes high-pressure water to clear out clogs and clean the inner walls of the pipes, restoring proper flow and minimizing future blockages.

6. Excavation Plumbing Inspections: We provide comprehensive plumbing inspections for excavation projects to assess the condition of existing plumbing systems, identify potential issues, and recommend appropriate repairs or replacements. Our thorough inspections help you make informed decisions and avoid costly plumbing emergencies down the road.

Prospect, Mundelein, Northbrook, and Palatine.
